

# Tessellation Art – Paper Cut Method

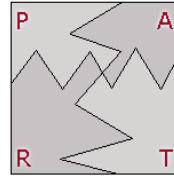

A tessellation is created when a repeating shape covers a plane without any gaps or overlaps.

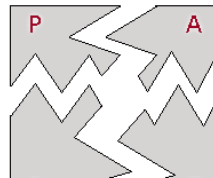

1. Write "PART" in the corners like this.

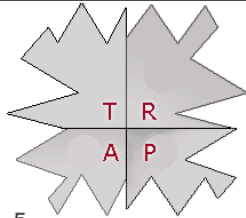

2. Draw a random line on the paper left-to-right.

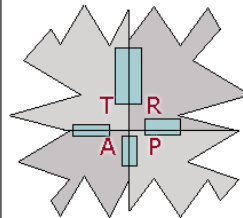

3. Draw a second random line on the paper top-to-bottom.

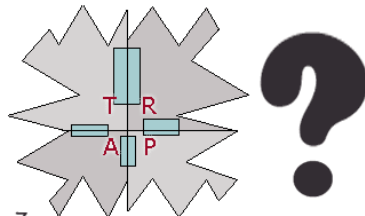

4. Cut out your shapes on the lines you drew.

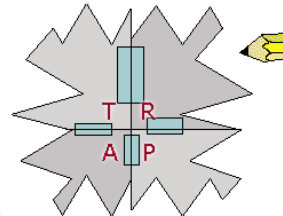

5. Put the pieces together so corners are in the middle and they spell "TRAP" like this.

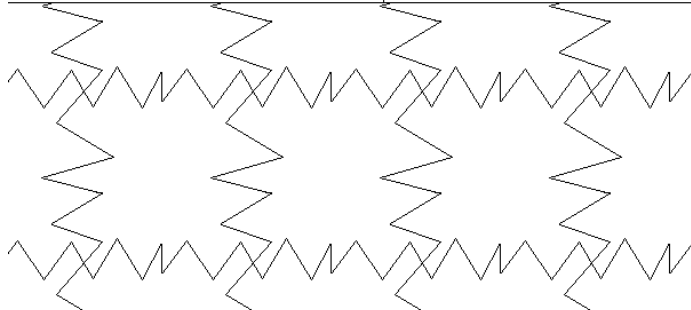

6. Tape the pieces together.

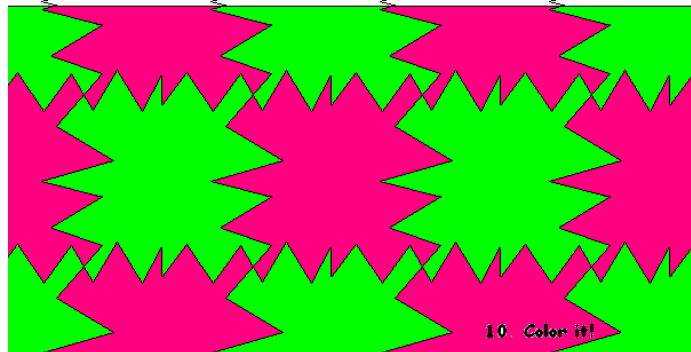

7. Decide what the heck it looks like.

8. Start tracing with your stencil.

9. It'll fit perfectly if done correctly

10. Color it!
