

WATER CHALLENGE!

8 ways TO save water

Governor Brown has declared California in a State of Emergency! We are having one of the most severe droughts ever and we must reduce our water use by 25%!

RETHINK how you use water by doing the following steps:

💧 In the shower...

- set a 5-minute timer- saves 175 gallons a week
- already doing that? try turning off the water when using shampoo, conditioner, &/ or soap and conserve even more

💧 The bathroom sink...

- shut off the water while brushing and washing- saves 15 gallons a day

💧 In the kitchen and laundry room, remind your parents to try to...

- soak the dishes, don't let the water run, & dishwashers save more water
- run full loads in dishwasher & laundry machines- saves 5 gallons a load

💧 Outside you and your parents can try to...

- use a watering can and never let the hose run
- check sprinklers to make sure they are only spraying the lawn & only water early morning or late night
- when washing bikes, cars, etc. use a bucket- saves 15 gallons a minute

More information and tips can be found at saveourwater.com

Due by Friday, April 24th!

Please submit to your teacher for Earth Week poster points.
